

Invitation to visit

Nuremberg, Germany

27–29.4.2010

POWTECH 2010

International Trade Fair for Mechanical
Processing Technologies and Instrumentation

Together with

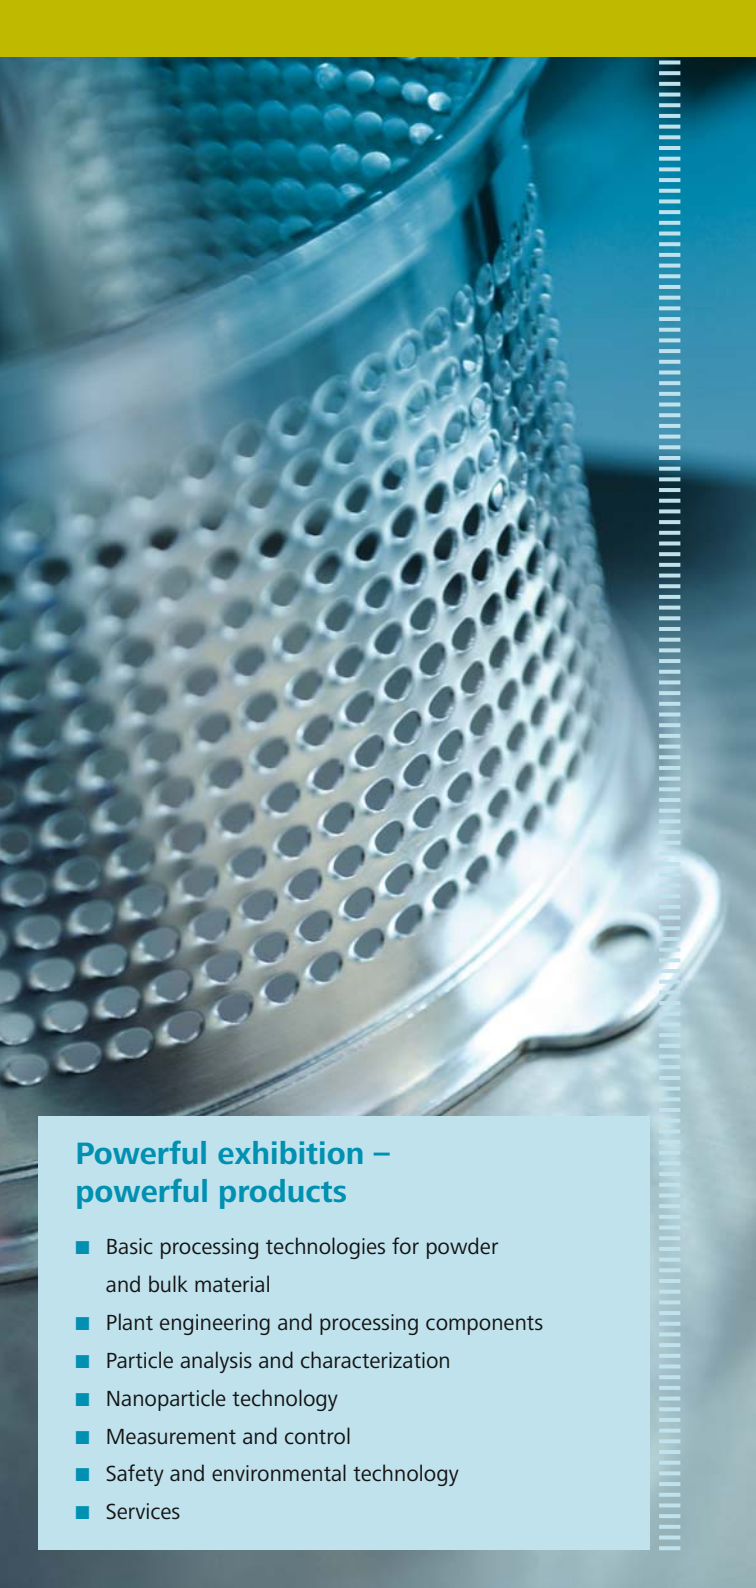

TechnoPharm 2010

WCPT62010

World Congress on Particle Technology,
supported by PARTEC

NÜRNBERG / MESSE

Powerful exhibition – powerful products

- Basic processing technologies for powder and bulk material
- Plant engineering and processing components
- Particle analysis and characterization
- Nanoparticle technology
- Measurement and control
- Safety and environmental technology
- Services

It's the form that counts!

And this is exactly why Nuremberg offers you an information platform that is unique on the international exhibition scene: POWTECH is the world's biggest exhibition for mechanical processing technologies and instrumentation – which makes it the most effective expert forum in the market. Here you meet the leading specialists with products and ideas that make the difference. Higher productivity, increased profitability and new technologies: POWTECH covers all these fields and provides much more. For example, in its attractive supporting programme or at the accompanying WCPT6 (World Congress on Particle Technology, supported by PARTEC). And not least through its close link with the themes of TechnoPharm, which offers you a variety of new perspectives in life science technologies. Look forward to direct dialogue with the experts and more than 1,000 exhibitors. Plan your visit now – using the industry platform ask-POWTECH. We would be pleased to see you.

Welcome to POWTECH!

Claudia Hauser-Vollrath

Exhibition Manager POWTECH

Wanted? Found!

www.ask-POWTECH.de

Each and every exhibitor, product and novelty at
your fingertips, always up-to-date, 365 days a year,
24 hours a day!

Play safe!

Explosive dusts and gases demand the highest degree of safety in many processes – and a lot of know-how! Bring your knowledge up to date and source information on innovations in safety and explosion protection. Exciting live shows in the exhibition centre park give you the opportunity to experience the scale of a dust explosion at close range.

Attractive supporting programme

POWTECH is again rounded off by an attractive supporting programme with many special features such as:

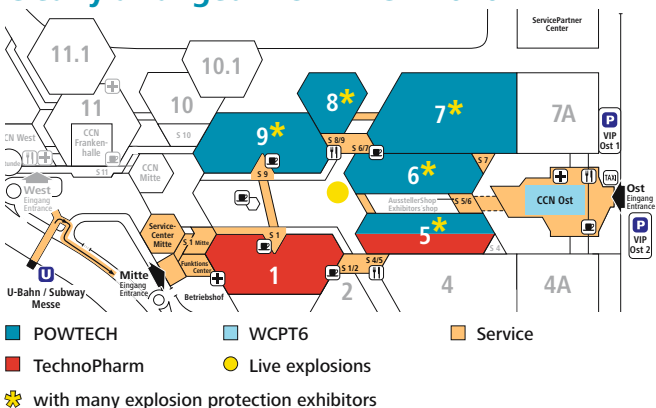

- Seminar on industrial explosion protection and tests to the German Health & Safety at Work Act – practical examples; VDI Wissensforum, Düsseldorf
- Symposium on “The future of process control”, Hüthig-Verlag, Heidelberg, and APV, Mainz
- Live explosions in the exhibition centre park
- nanoTruck – high-tech from the nano cosmos of the Federal Ministry of Education and Research (BMBF)
- Pavilion for young, innovative companies
- Exhibitors Forum

Subject to change. As of: October 2009.

Visit POWTECH 2010

on the Internet:

www.powtech.de

Venue and date

Exhibition Centre Nuremberg

Tue – Thu, 27 – 29.4.2010

Opening times

Tue – Wed 9 a.m. – 6 p.m.

Thu 9 a.m. – 5 p.m.

Ticket office

1-day ticket EUR 25

Permanent ticket EUR 35

POWTECH catalogue EUR 15

TechnoPharm catalogue EUR 10

Entrance tickets are valid for admission to both POWTECH and TechnoPharm!

Online ticket shop

until 23.4.2010

The advantages

- Reduced entrance price
- Fast admission to the exhibition

Our offer

■ 1-day ticket EUR 15

■ Permanent ticket EUR 20

All prices include VAT at the statutory rate.

This brochure is also available in German.

Chemicals

Chemical and pharmaceutical industries

Apparatus, components and plant for

- manufacturing chemical products
- dyes and pigments
- chemical fibres
- rubber/plastic products
- pharmaceutical products
- detergents, cleaning agents and body care products
- fertilizers and nitrogen compounds
- pest control and management
- (natural) cosmetics

Preselected for you at:

www.powtech.de/chemicals

All exhibitors and products at POWTECH 2010

The chemistry is right here!

Mechanical processing technologies influence many segments in the chemical and pharmaceutical industries. The production of many source, intermediate and end products depends on efficient technologies for size reduction, milling, screening, mixing or granulating.

So get the answers to tomorrow's challenges today: from a broad spectrum of solutions ranging from raw material processing to nanotechnology. Rely on the basis provided by the leading exhibition: on the POWTECH success story. Here you can obtain concentrated and comprehensive information on new developments and trends in processing powder, granules and bulk solids. Use the direct dialogue with experts – at POWTECH 2010 in Nuremberg.

Food

Food manufacture

Apparatus, components and plant for

- the food industry
- the production of food
- the production of animal feed
- mill and starch products
- high food/functional food

Preselected for you at:

www.powtech.de/food

All exhibitors and products at POWTECH 2010

Information with a bite for experts

The historical roots of mechanical processing technologies are anchored in the food industry. Key technologies for size reduction, milling, mixing or screening have always formed the basis of our “bread and butter” and other processes for manufacturing food. To this day, hardly any other sector of industry has produced so many innovations. The food industry generates key ideas for new developments and improvements in mechanical processing technologies.

So update on tomorrow’s solutions today: on high-precision dosing and careful mixing processes and the latest news from particle analysis. Rely on the basis provided by the leading exhibition for powder, granule and bulk solids technologies. Use the direct dialogue with experts – at POWTECH 2010 in Nuremberg.

Construction and quarrying

**Building material, recycling,
quarrying, earthworks,
coal and ore industries**

**Apparatus, components
and plant for**

- construction industry
- mining, coal and ore mining
- quarrying and earthworks
- cement, lime, gypsum
- recycling/environmental technologies

Preselected for you at:

www.powtech.de/building

All exhibitors and products at POWTECH 2010

Build on expert knowledge!

Rely on the basis provided by an undisputed leading exhibition: on the success story of POWTECH, the exhibition for powder, granule and bulk solids technologies. Modern mechanical processing technologies and innovative particle analysis form the backbone of profitable plants in the building material, recycling, quarrying, earthworks, coal and ore industries.

Find out more about today's process technologies and tomorrow's trends. Use the direct exchange with the manufacturers of pioneering key technologies and experts from stone quarries, sandpits, mining and construction chemicals – at POWTECH 2010 in Nuremberg.

Ceramic and glass

Ceramic, china and glass industries

Apparatus, components and plant for

- glass and ceramic products
- manufacture of other mineral products

Preselected for you at:

www.powtech.de/glass

All exhibitors and products at POWTECH 2010

Sound information!

It is not without reason that mechanical processing technologies play a major role in the ceramic, china and glass industries: they form the basis for efficient processes and high-quality end products. All source materials – the complete spectrum of silicates, oxidic, non-oxidic and metallic ceramic raw materials – are involved in mechanical processes during the production chain.

So rely on a knowledge lead you can incorporate in your processes on a one-to-one basis. Update on the latest developments and new products from nanotechnology – at the expert forum for powder, granule and bulk solids technologies. At POWTECH you simply find out more about new analysis processes and trends for processes and plants.

Wood

Wood, paper and pulp industries

Apparatus, components and plant for

- paper and pulp sector
- agriculture and forestry
- wood-working sector

Preselected for you at:

www.powtech.de/wood

All exhibitors and products at POWTECH 2010

Wood in its best form!

Key technologies like size reduction, milling, mixing and screening are the basis of the wood, paper and pulp industries, but the market requirements are increasing all the time: the focus is on powerful and economic extraction, screening and dedusting systems. Growing market segments like wood pellet production also need powerful solutions – for compacting too.

So use the direct contact with well-known manufacturers, developers and production experts. At POWTECH, the leading exhibition for powder, granule and bulk solids technologies, you simply find out more about pioneering products, current technologies and future trends. From explosion protection and filter systems to animal feed production – you find what you're looking for at POWTECH 2010 in Nuremberg.
